PROFILE

Full-stack developer with proven experience building and scaling products across EdTech, FinTech, and LegalTech startups.

Skilled in JavaScript/TypeScript ecosystems with a strong backend focus, I've led development teams in delivering complex projects from MVPs to production. Currently heading technology at EPICODE, where I drive innovation in learning platforms through AI integration and modern architecture.

Passionate about clean code and creating developer-friendly environments that enable teams to deliver their best work.

Looking to take on challenging projects where I can leverage my technical expertise and leadership experience to drive meaningful impact.

WORK EXPERIENCE

HEAD OF TECH

EPICODE

2023-Ongoing

- Led the development of a new LMS platform, successfully launched in just 5 months.
- Implemented personalized learning strategies using GPT Models, demonstrating an ability to leverage cutting-edge technologies to achieve educational objectives.
- Responsible for the modern look and feel of the interface, demonstrating creative vision and user-centric focus.
- Improved Developer Experience (DX) significantly, ensuring a productive environment for technical members.
- Implemented clean coding standards, showing dedication to quality and maintainability of code.
- Delivery of the infrastructure fully as Infrastructure as Code (IaC), highlighting technical expertise and forward-thinking in the scalability of services.
- Continuously pushing for team improvement through innovative ideas and research and development efforts.
- Enhanced team's competencies and product quality through regular knowledge sharing and mentoring.
- Built a real-time google meet like interview platform powered by AI agents to prepare students for job interviews.

FULLSTACK DEVELOPER

EPICODE

2021

- Integrated legacy systems with new systems after the company merges.
- Maintained the newly integrated system to ensure smooth operations.
- Developed a serverless exam & certification system that handles thousands of exams and certificates simultaneously.
- Introduced an automated attendance tracking feature, integrated with popular meeting services such as Zoom and Webex.
- Led research and development initiatives for the creation of innovative platforms.

WORK EXPERIENCE

FULLSTACK DEVELOPER

SIBILL 2021

- I played a key role in the development of the minimum viable product (MVP) for Sibill.
- Contributed to the development of a cloud-based SaaS platform integrating features like open banking, e-invoice storage, and cash flow monitoring.
- Adapted to and utilized complex tech ecosystems such as open banking APIs and AWS cloud technologies.
- Maintained high-quality code while delivering rapid results.
- Efficiently developed prototypes, aiding the project's discovery phase.

EDUCATION

Software Engineering Bachelor

FIRAT UNIVERSITY

2020

Dropped my education in the second year, due to career advancement.

Fullstack Development

EPICODE

2020

6 months of intensive web development education.

FULLSTACK DEVELOPER

OneDocs 2020-2021

- Helped build the first working version of a legal technology product.
- Made a unique WYSIWYG editor to create legal contracts that can take different variables.
- Had a big part in creating APIs, which help parts of a system talk to each other.
- Created SSO & OAuth2 system to ensure smooth authentication experience in multiple products.
- Created a service to generate documents in different formats based on user needs.
